

Promoting from Within

Evansville Marine Service, Inc has carried a long history of promoting from within whether it is on our dock string, in a crane, or on a boat.

We look for existing employees that exhibit leadership, good time management, adhering to company policy and striving to better their work habits. We have given the opportunity to several employees to achieve their operator status through the steersman program. 44% of our current pilots obtained their license through EMS or an EMS acquired company. This has allowed EMS to increase our service and support to our customers. We are proud of our employees and the great success they have accomplished.

CONGRATULATIONS & BEST OF LUCK!

We currently have 7 employees working toward achieving the goal of operator status.
